Flexsafe® 3D Bags are designed for storage and shipping of large volume of biopharmaceutical solutions in Pallettank from 100L to 3,000 L.

They are supplied sterile and ready to use for an easy and convenient process implementation. The versatile range of Flexsafe® Pre-Designed Solutions (PDS) allows for sterile filtration, storage and transfer of all biopharmaceutical fluids.

Flex E Bags are the perfect solution for your logistics needs. Our Flex E Bags are made of high-quality materials, ensuring long-term durability and reliability. They are lightweight and easy to handle, making them perfect for transporting a wide range of products. Our Flex E Bags are imported and supplied across the Middle East, India and Europe, so you can be confident that you are getting the highest quality at the best price. With their superior performance and durability, Flex E Bags are the perfect choice for your logistics needs.

Do You Have A Project using Flexi Tank..

The entire process of transporting bulk liquids safely can be a real challenge due to the weight of the product and the force that it can generate while in transit. The key to the safe transportation of liquids is to ensure that the liquid does not move during the journey. To prevent liquid movement while also offering a more compact and space-efficient storage and shipping method, ANC Distribution offers the wide range of Waterplex LiquiA Flexitanks that we have available. From the space-saving K-Flex Intermediate Bulk Containers to the warming H-Flex Heating System, these Flexitanks are all designed to take good care of your liquids throughout transport.
